Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Siler (U. S. Patent no. 6,367,593).

See figure 2

Note: the term “integrally” is used. This term does not require the end wall to be the same piece as the sidewall. It merely requires the two pieces to be joined to form a whole.

Response to Arguments

3. Applicant's arguments filed 7/22/04 have been fully considered but they are not persuasive. Applicants argue that the term integral requires that the element is made of one piece. The examiner disagrees. Random House College dictionary (1980) defines integral as “made up of parts that together constitute a whole .” Furthermore, once assembled, the two piece assembly becomes one piece (see figure 1). There is no relative movement between the parts and it functions in the exact same way as the instant invention. Applicants argue that the Siler does not disclose a cup shaped element. Please see Figure 1 where the two pieces are clearly joined to form a cup shape. Applicants further argue that “if the pieces are different, the ball screw will fall

apart, as no means for joining is disclosed". The examiner disagrees on two grounds.

First, the Applicant's statements implies that the ball screw of Siler would fall apart since the pieces are different. The examiner will not accept arguments based on the operability of the prior art. Second, the prior does disclose a means for joining, namely the keys 50 and keyways 52.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
